

Who Benefits from Your EITC Pre-K Scholarship Contribution?

Low- and moderate-income children and their families benefit from your donation.

Quality Pre-K programs in our community cost an average of about \$10,000 per year. For low-income, working families this is often their largest expense.

In fact, for some families, it's the reason a parent can't afford to work.

We provide full and partial scholarships so children can attend carefully vetted and closely monitored quality Pre-K programs.

Our partners meet high performance standards and commit to staff development, child-centered learning, and continuous improvement.

About United Way of Bucks County

With the help of donors and partners, we make sure the most vulnerable people in our community can access care and opportunity.

Specifically, we invest in collaborations to:

- Provide early childhood education, care, and support for parents
- Eliminate hunger and food insecurity
- Give hard-working families help with one-time emergencies
- Help older residents access support and benefits
- Ensure that homeless families and individuals have access to "street outreach" so they get housed faster

We work to create lasting change for our friends and neighbors. Together, we make Bucks County a stronger, healthier community.

EITC: Educational Improvement Tax Credit

PRE-KINDERGARTEN

It may cost your business nothing to give a child everything.

Why do Pre-K Scholarships Matter?

Investing in early childhood education is critically important. 90% of a child's brain development happens in the first 5 years of life.

Quality early ed teaches critical thinking and helps children form healthy relationships. These kids are significantly more likely to succeed in school and in life.

Every \$1 invested saves up to \$17 long term and generates \$1.79 in economic activity immediately.

With access to early childhood education, at-risk kids are:

- Less likely to be placed in special education and less likely to repeat grades
- More likely to graduate from high school and a post-secondary program
- More likely to become employed, economically self-sufficient adults
